- 
- 

PROGRAM PERSPECTIVE

The seminar on “Disaster Risk Management” is designed to address the growing need for robust preparedness and response strategies in industrial environments. With increasing complexity in operations and heightened risk factors, organizations must adopt a proactive approach to mitigate potential disasters. This program brings together industry experts, legal authorities, and emergency response professionals to share insights, best practices, and regulatory frameworks that ensure safety and resilience. By fostering collaboration between stakeholders, the seminar aims to strengthen organizational capability to manage emergencies effectively and safeguard lives, assets, and the environment.
